NOTICE TO RESIDENTS ARLINGTON RECONSTRUCTION

This letter is to advise you that the Arlington Street Reconstruction Project is on schedule to begin the week of April 11, 2016 based on the extended weather forecast.

On Monday signage will be brought to the site, catch basins protected and possibly saw cutting will begin. Please park cars in your driveway during the day to allow access for construction.

Beginning Tuesday, April 12th, removal of pavement in Stage 1 will begin and all vehicles in Stage 1 will have to be out of the construction area before 7:00 AM. Stage one will be the south half of street being removed and repaved from 10 Mile to 25195 Arlington.

There will be limited parking on Arlington from 10 Mile Road to Church Street until the construction is complete. Residents on Arlington may park on adjoining side streets. All residents with access should park vehicles in their driveway to leave street parking for the residents without access to their driveways during construction. There will be **no parking on the west side of Arlington** throughout the construction to maintain access to the hydrants and passage of emergency vehicles.

The mail service will be not be interrupted by the construction.

Trash pick up will be handled by the contractor. Please place your trash out as usual at the end of your drive (after 6:00 PM the previous evening or before 7:00 AM on the day of pick up) and it will be taken to the nearest available location for pick up. We ask that you mark your address in **bold letters** on your trash and recycling carts to assist in the return. If possible, please use brown kraft bags for grass clippings rather than cans.

Please remove any landscaping installed in the City right-of-way. Mark sprinkler heads located in the City right-of-way as MISS DIG does not have a record of these and if marked there will be less chance of damage. During the removal of sidewalk, approaches and the street anything in the right-of-way will also be removed and discarded.

At this time, we would like to apologize for any inconvenience. We thank you for your patience and cooperation during this project. If you have any questions please contact the City of Roseville Engineering Department at (586) 445-5445.
